

CS 4600: Senior Project

Progress Checkpoint 5 Agenda

Paula Lozano Gonzalo

March 31, 2025

Project: Stardew Valley Mod Agent

1. Progress Update

- **Mod Integration:**

- Everything is put together and it works!

- **Functionality Testing:**

- Using the mod to ask questions and making sure the answers are accurate.

- **Optimization Considerations:**

- I need to clean the data and make the database bigger.
- It takes a while to load the messages (like 30s).

2. Challenges and Considerations

- No major roadblocks at the moment.
- I need to clean my repository, probably make a new one to organize everything better.
- I expect significant effort in installing the mod for other people.
- I still need to make the script to check that docker and ollama are running.

3. Milestone Adjustments

I'm still on track and making faster progress now.

4. Questions for Instructor

- I have been struggling with cleaning up the data so I've been thinking on doing it myself.
